Chapter 1

Statement of Teaching

In the modern world, where distractions are constant and attention is limited, I believe a good teacher must be creative, capture students' attention, spark curiosity, and remain informed about developments in both the discipline and pedagogy. My teaching philosophy is grounded in building strong relationships with students, connecting concepts to their interests, and creating a learning environment that is inclusive, engaging, and relevant.

Building Connections from the First Day

Strong teacher–student relationships are fundamental to effective learning. At the beginning of each semester, I take deliberate steps to ensure we know one another beyond names on a roster. I ask students about their preferred names and pronouns, majors, relevant background knowledge, and personal interests. I also share my own academic journey, from undergraduate studies to graduate school and my current research as a Ph.D. candidate. This helps students see me as an instructor who understands their academic concerns and aspirations. These conversations often spark discussions about research, graduate school, and careers. I encourage students to reach out with questions about both the course and their broader academic plans, so they feel supported in multiple dimensions of their education.

Inspiring Interest Through Students' Passions

One of the most effective ways to engage students is to connect course material to topics they care about. For example, while teaching Elements of Statistics, I learned that many students were majoring in sports business. This led me to use data from University of Oklahoma football games to illustrate probability concepts. The moment I mentioned OU games, I could see their attention sharpen. By grounding abstract concepts in contexts they find exciting, I turn material that might otherwise feel distant into something familiar and motivating.

Introducing Relevant and Thought-Provoking Content

Beyond connecting to students' existing passions, I deliberately introduce concepts and topics that I believe will spark new interests. I often begin class with a simple takeaway from a research paper, a surprising fact, a current event, or a real-world application related to the day's lesson. For example, in Elements of Statistics, I introduced the topic of the gender wage gap, explaining why it matters and discussing the reality that no country yet has full pay equality. Later, while teaching sampling and selection bias, I used the fact that not all women participate in the labor force to illustrate how biases can arise in wage data. Using parts of real datasets, I demonstrated how regression analysis can be applied to understand how education or experience affects income. These approaches deepen understanding of statistical concepts while showing how economics can be applied to real data.

Capturing and Maintaining Attention

With so much engaging content available online, students expect learning experiences that are dynamic and visually stimulating. I use visuals, memes, videos, and cultural references to bring concepts to life. For example, in Principles of Microeconomics I introduced game theory with a clip from *A Beautiful Mind*. Many students had seen the film but did not realize that John Nash, the protagonist, developed the equilibrium concept we were about to study. In the scene, Nash explains to his friends that if they all pursue the same woman, they block each other's success – a vivid and memorable way to illustrate the Nash equilibrium.

Keeping students' attention also requires active involvement. To complement these visual elements, I design interactive activities such as short quizzes, quick in-class assignments, and thought-provoking questions. I also promote collaboration by assigning students to small, randomly selected groups for problem-solving exercises. These activities not only sustain engagement but also encourage students to learn from each other's approaches.

Bringing Technology into the Classroom

I see technology as an essential part of preparing students for future careers. In my Elements of Statistics course, I designed case studies where students used Excel to analyze real-world data and apply class concepts in practical ways. Student evaluations consistently note that case studies made a great impact, allowing them to see and practice the material in a realistic way. When appropriate, I also introduce software such as R or Stata to demonstrate how statistical methods are applied in professional and research settings. These tools not only make the class more dynamic and interactive but also give students valuable hands-on experience with technologies they are likely to encounter beyond the classroom. In addition, I discuss how artificial intelligence can be used responsibly for academic purposes, such as

exploring code, generating research ideas, and checking comprehension. By showing students how to combine economic reasoning with modern tools, I help them see themselves as capable problem-solvers ready for the challenges ahead.

Adapting to Class Size and Delivery Mode

My teaching approach adapts to the size and format of the class. As a TA for a large Principles of Microeconomics course with nearly 150 students, I was responsible for leading several sessions. In this setting, it was essential to project energy, move around the room, and use microphones and slides effectively to maintain attention. I structured material into clear segments and used show-of-hands questions to check comprehension without losing pace. By contrast, in smaller classes I can pause more often for open discussion, tailor examples to students' interests, and create a more conversational environment. Teaching online presents a different challenge: sustaining engagement when students are behind a screen. In my Elements of Statistics course on Zoom, I found that long lectures quickly led to disengagement, so I broke sessions into shorter modules and included short quizzes based on the material just covered. Students completed these individually, and afterward I went over the questions, clarifying concepts and working through any that they found difficult. I also made recordings and step-by-step notes available afterward, so students had multiple ways to engage with the material.

Teaching as a Collaborative Process

I view teaching as a reciprocal process in which the classroom becomes a collaborative space. While I structure and guide the learning experience, I also value what students contribute. Their perspectives and questions often lead me to refine my examples, adjust explanations, or incorporate new material. To support this collaboration, I design short surveys and guided discussions throughout the semester to gather students' feedback on what they find most helpful, what could be improved, and suggestions for new approaches. Student evaluation results reflect this process, showing steady improvement across semesters and reaching 100% in students' reported learning experience by Summer 2025. This helps me adapt my teaching to meet the needs of the class while modeling the kind of open, evidence-based inquiry that is central to economics.

Ultimately, my goal is not just to transfer information but to inspire curiosity, foster critical thinking, and equip students with both the conceptual frameworks and practical skills they need to apply economics in their academic, professional, and personal lives. Whether students go on to graduate school, enter the workforce, or simply carry economic reasoning into their everyday decisions, I want them to leave my classroom more confident in their ability to understand and engage with the world.

Chapter 2

Courses Taught and Enrollments

2.1 Instructor

During my Ph.D. studies at the University of Oklahoma, I taught five classes as the primary instructor. These courses consisted of two following undergraduate classes:

- **ECON 1123: Principles of Economics-Micro**

Focuses on goals, incentives, and allocation of resources resulting from economic behavior, with applications and illustrations from current issues. Topics include the operation of markets for goods, services, and factors of production; the behavior of firms and industries in different types of competition; and income distribution. See Section 5.1 for the full syllabus.

- **ECON 2843: Elements of Statistics**

Covers basic statistical techniques emphasizing business and economic applications. Topics include data summary techniques, elementary probability theory, estimation, hypothesis testing, simple regression, time-series, and index numbers. See Section 5.2 for the full syllabus.

Table 2.1: Courses Taught as Instructor

Year	Semester	Course	Enrollment
2025	Summer	ECON 2843: Elements of Statistics	16
2024	Fall	ECON 2843: Elements of Statistics	27
2024	Summer	ECON 2843: Elements of Statistics	13
2023	Fall	ECON 2843: Elements of Statistics	8
2023	Summer	ECON 1123: Principles of Microeconomics	24

2.2 Teaching Assistant

Below is a list of courses where I served as a Teaching Assistant or Guest Lecturer.

Table 2.2: Add caption

Course	Level	Responsibilities
ECON 3113: Intermediate Microeconomic Theory	Undergrad	Led problem-solving sessions Led exam preparation sessions Held office hours graded assignments
ECON 3513: Labor Problems	Undergrad	Assisted with coursework Held office hours Graded assignments
ECON 4513: Economics of Discrimination	Undergrad	Held office hours Supported class discussions Graded assignments
ECON 4233: Introduction to Applied Econometrics	Undergrad	Assisted with empirical exercises Held office hours Graded assignments
ECON 6433: Labor Economics I	PhD	Guest lectures Supported student research projects Evaluated problem sets Held office hours
ECON 5243: Econometrics II	PhD	Assisted with empirical exercises Held office hours Graded assignments

Chapter 3

Student Course Evaluations Summary

In total, I have taught *ECON 2843: Elements of Statistics* four times between Fall 2023 and Summer 2025. To document my teaching effectiveness, I summarize course evaluation results across all four offerings. The figures that follow highlight three key aspects of my teaching: **course organization**, **student learning experience**, and the **perceived impact of the course on student learning**. Together, these evaluations provide a picture of my ability to structure the course clearly, create a supportive learning environment, and help students build lasting skills. See Sections 5.3, 5.4, and 5.5 for the complete recent evaluations.

3.1 Course Organization

This section summarizes how students evaluated the organization of the course. I used 3 questions to capture my performance:

1. To what extent were the expectations and grading scheme for assignments and the overall course made clear?
2. To what extent did Mahla Shourian appear to be organized and prepared for student interactions?
3. To what extent was the course website/Canvas helpful?

Figure 3.1 shows the percentage of students selecting the top response for each of these questions across four terms. The results indicate consistently high ratings, with all three measures improving over time and reaching 100% by Summer 2025. These results suggest that students found the course expectations transparent, the instruction well prepared, and the online resources valuable for their learning.

Figure 3.1: Course Organization Ratings Across Terms

3.2 Student Learning Experience

This section highlights how students evaluated their overall learning experience in the course. Four evaluation questions capture this dimension:

1. To what extent were the reading assignments and/or online instructional materials beneficial to your learning?
2. To what extent did Mahla Shourian explain or demonstrate the larger purpose or value of the material covered in this course?
3. To what extent did Mahla Shourian use a variety of examples or approaches to illustrate concepts?
4. How often did the assignments, projects, discussions, rehearsals, performances, and/or exams seem connected to the course content and goals?

Figure 3.2 reports the percentage of students selecting the most favorable responses across terms. The results indicate that students consistently viewed the instructional materials and assignments as beneficial and aligned with course goals. In addition, students frequently noted that concepts were explained with clear examples and connected to broader purposes,

suggesting that the course structure successfully supported both comprehension and engagement.

Figure 3.2: Student Learning Experience Ratings Across Terms

3.3 Course Impact on Learning

This section highlights the impact of the course on students' learning and skill development. Students were asked:

Which of the following skills do you think this course helped you develop or improve? (choose all that apply)

While the survey listed a broad set of possible skills, I focus on four that I believe are essential to develop in introductory Economics courses: problem-solving, critical thinking, conducting analysis, and discipline-specific skills. These skills reflect both the technical and conceptual foundations needed for success in economics.

Figure 3.3 summarizes student responses. The results show that a large share of students reported improvement in problem-solving, critical thinking, and conducting analysis, indicating that the course effectively supported higher-order thinking and application of economic reasoning. In addition, students identified growth in discipline-specific skills, suggesting that the course strengthened their ability to apply quantitative and statistical tools directly relevant to economics.

Figure 3.3: Student-Reported Learning Outcomes Across Terms

3.4 Addressing Areas for Improvement

In earlier offerings of this course, some students noted that while assignments and grading were clear, the absence of instructor-recorded video lectures made it harder to follow along. For example, one student mentioned relying heavily on outside resources such as Khan Academy videos to understand the material. Another student shared that although they were able to perform well on assessments, they did not feel they had built lasting knowledge. Taking this feedback seriously, I began recording and sharing structured lecture videos in later semesters to supplement the textbook and provide step-by-step explanations of core statistical concepts.

Additionally, some students expressed that clearer explanations of sample test questions would strengthen their preparation. In response, I revised the practice materials to include worked solutions with detailed reasoning, ensuring that students could review not just the correct answers but also the underlying thought process. These changes helped improve both the accessibility of the course content and the depth of student learning, as reflected in subsequent evaluations that highlighted clear explanations, practice exercises, and well-organized materials as strengths.

Chapter 4

Students Feedback

One of the most rewarding aspects of teaching has been hearing directly from my students about the impact I have had on their learning and growth. As a teacher, I put great care into creating an inclusive and supportive classroom environment where students feel encouraged to challenge themselves and succeed. Receiving their feedback is deeply meaningful to me. It affirms not only that I am helping them understand the material, but also that I am making a difference in their academic journeys. I am proud and grateful for the kind words my students have shared, and in this section I highlight a few comments that capture both their experiences and my passion for teaching.

Juliet Farrell
ECON-2843-850
Jan 8, 2025 at 2:30pm

↩ ⋮

Good afternoon, Professor Shourian.

I have attached the screenshot showing completion of the course reflection survey as requested for extra credit.

I also want to take this time to thank you for a great experience with my first ever intercession course. I was very nervous knowing that it would require large amounts of material to be covered in a small amount of time, but the way you set the course up and covered the material in your lectures was very helpful. I wish all courses were this straight-forward.

As a non-traditional student, I always appreciate courses that are set up in a way to put the freedom as well as burden of responsibility on us as the student to complete assignments and prepare for tests. Thank you for a great experience and for being so helpful at the start of class when I had purchased the wrong edition of the textbook.

I look forward to finishing the class on a high note this Friday. I hope you have a great Spring semester ahead of you.

Best wishes,

Juliet Farrell

Ryan Pharr

ECON-2843-850

Jan 9, 2025 at 3:54pm

I was just wanting to thank you on a great winter course. I appreciate how organized your class was. Also I wanted to make sure that you received my survey, so I can get those 5 points added to my final grade.

Thank you,

Ryan Pharr

From: Nesru, Rihana R. <Rihana.R.Nesru-1@ou.edu>

Date: Friday, January 10, 2025 at 9:49 PM

To: Shourian, Mahla <mahla.shourian@ou.edu>

Subject: Extra Credit

Good Evening,

I just wanted to thank you for this course and all that you put into it. I appreciate how understanding you were through the rocky start i had and am wishing you the best in the future. I also attached a screenshot of my survey for extra credit. Thank you again!

Best,
Rihana

Professor Shourian was wonderful, I had some issues with the course materials I purchased (I purchased the OU One recommended 5th edition textbook which did not get me access to the 4th Edition textbook course that was registered for the class) and she was willing to work with me and communicate with me as I navigated fixing the issue.

This course was honestly one of the best ones I have taken at OU.

Always made sure we understood concepts and added in practice exercises to give as a better understanding. Explained every step, making it easy to follow.

Professor was easily accessible and really made an effort to make sure we understood lessons.

Appendix

SYLLABUS

ECON 2843: Elements of Statistics

INSTRUCTOR INFORMATION

Instructor: Mahla Shourian

Email: mahla.shourian@ou.edu

Communications: Communications will be accomplished primarily through Canvas and by email. All pertinent student emails will be answered within 24- 48 hours of their arrival, unless prior notice of a delayed response is provided. For a quicker response please put the course prefix and number in the subject line (e.g., CAS 1234: Question about the Syllabus).

Email Account, Canvas and Connect: Students are expected to check their OU email accounts and the course site on Canvas daily for updates from the instructor. You will need to be sure to do the following:

- [Set up your Connect account to access you homework and exams](#)
- [Set up your default email address so you can reply to email directly from Canvas.](#)
- [Set your profile photo](#) as well and make sure to set up your [Canvas notifications.](#)
- [Update the Display Name in your Canvas profile](#) so we know what you prefer to be called!
- It is also recommended that you download and install the [Canvas Mobile app](#) for your device for on-the-go access to course materials, schedule, and communications.
- **Use this website to link to the course:** m-shourian-summer-2025-2843-200

Office hours:

By appointment. Note: All office hour meetings will be done on Zoom. They should all be scheduled ahead of time. Simply send me an email if you would like to schedule a meeting, so I could share with you the link and passcode for the Zoom meeting.

COURSE DESCRIPTION

Course Description:

This is an introductory statistics course, which surveys basic statistical techniques with particular emphasis on business and economic applications. The learning objective of this course is to improve students' analytical skills in understanding and employing the descriptive and inferential statistics. We begin this course by learning how to describe the data in use. Then, we focus on applied probability theory, which enables us to understand the essence of statistical inference. And for the rest of the course, we explore multiple inference tools such as confidence interval estimation, hypothesis testing, and the analysis of variance. These tools help us make use of sample data to reach conclusions about population parameters.

Course Delivery Method:

The course will be delivered via **Video Conference using Zoom**. Classes will be held **Monday through Thursday from 10:30 AM to 12:45 PM (Central Time)**. The **Class Zoom Link** can be found on the main page of the course on **Canvas** under "[Class Zoom Link](#)." Assignments and activities will be listed on and will be facilitated via the [Connect](#).

On **Fridays**, there will be **no live class sessions**. Instead, students will have the entire day to complete the **weekly test**, which is based on the material covered during the week.

I strongly encourage all students to **attend and actively participate** in the Zoom sessions. Engaging in real-time discussions not only helps deepen understanding of the material but also provides a valuable opportunity to ask questions and address any challenging concepts right away.

The Canvas website has a number of helpful resources. **The Canvas website also links directly to Connect, providing easy access to your online homework**, practice exams, and e-book. These collectively provide a great platform to engage with questions that are very similar to exam questions. A document giving you a step-by-step set of instructions on how to link up directly with Connect is also available on the Canvas Website.

Learning Outcomes:

Upon completion of this course, my goal is that you are able to:

1. Understand and explain basic statistical concepts and basic elements of real-world situations and to use the knowledge.
2. Apply your understanding of statistics and economics to current events, as well as being able to distinguish between correct and incorrect economic logic.
3. Take away a long-lasting interest in economics, statistics and the economy.

REQUIRED MATERIALS AND SOFTWARE

Required Materials:

The required text for the course is:

Business Statistics: Communicating with Numbers (Alison Kelly and Sanjiv Jaggia), ISBN-10: 1260716309 and ISBN-13: 978-1260716306.

To succeed in this class, it is critical that you spend time learning economics and statistics both inside and outside of the classroom. You need to purchase the e-book or hard copy version **with Connect access**. You can do this through the OU bookstore, the Connect website, or **the course website which has a direct link to the purchase**. If you have a problem using the Connect website, you should contact them at <http://mhhe.com/support> or call 1 - 800 - 331 - 5094 rather than contacting me.

Required Software:

You will need to have reliable daily internet access on your computer to access course documents and submit your work. *(Please see the [CAS Student Online Orientation](#) if you need assistance with Canvas.)*

GRADING POLICY

Points Breakdown:

ASSIGNMENTS	Percent of overall course grade
BookSmart homework and Quizzes	15%
Case studies	15%
Exams (1-4)	70%

Grading Scale:

A = 90% - 100% (900-1000 points)

B = 80% -89% (800-899 points)

C = 70% - 79% (700-799 points)

D = 60% -69% (600-699 points)

F = Below 60% (below 600 points)

Homework on Connect:

You will have online LearnSmart assignments. They come from the “**BookSmart**” **application** and are designed to help you learn the material in a manner tailored to your own style and strengths. **The homework is worth 15% of your final grade. You should score very well – that is my goal, and it should be your goal.** The LearnSmart homework is an adaptive study plan where students take activities on their own while the built-in diagnostic tool gauges their strengths and weaknesses and develops individualized learning plans and goals. Unfamiliarity with the concepts will undercut the 70% of your grade coming from exams.

DO NOT wait until the last few hours of the assignment window!! Internet connection can be lost. You may get emergency phone calls that need reactions. Life happens! Absolutely NO LATE HOMEWORK will earn points. It is an on-line system set up to award points only for what is completed prior to midnight of the due date. It’s automatic; I do not interact with the system timeline once it is set up initially. You are still able to complete past HW assignments for practice, but they do not generate points.

All assignment can be accessed through your McGraw-Hill account

Case Studies:

You will have case studies that will be completed through the Connect platform. These are assignments that we will use Excel to use real world data to apply what we have learned in class to real world examples. **They are worth 15% of your overall course grade.**

Exams:

You will have 4 Exams. They are given online through your McGraw-Hill connect account and strictly timed. All exams are multiple choice questions, and graphical based questions. Each exam only contains material that we covered in that section, so they are not cumulative. **Exams account for 70% of your overall course grade.**

You may take the exams at any point before their due dates. They are timed and you only have 1 attempt. Make sure you have properly prepared for each test before opening them as the timer for the test will start once you have clicked on the exam tab. Thus, **do not click on the exam tab until you are ready to take the test.** I will not reopen an exam for any excuse. If you accidentally enter the exam, you may take the optional final exam at the end of the course.

Optional Final Exam:

There will be an optional final exam that is given on the final exam day along with exam 4. The optional final exam is 100% optional and will cover material from exam 1, 2 and 3. If you take the optional final and score higher on it than you did on either exam 1, 2 or 3, then it will replace one of them. If you take the optional final exam and score lower than you did on either of the first 3 exams it will not count against you and not be added to the gradebook.

Missed Exams:

If you miss an exam or you fail to take the exam in the allotted time window this is on you. Remember the exams are all online and it is up to the student to make sure they have good internet connection. If you fear you might not have the resources needed to take the exam you can take it at the University Library. The only exceptions for missing a test are health (with correct documentation) or university events that require you to miss class. If you are missing a test date you need to let me know BEFORE the exam day so we can work out a plan. If you do not, then you will have to take a 0 and take the optional final.

Grade Calculation:

To be fair to all students, NO GRADES WILL BE ADJUSTED on the basis of being “close”.

ASSIGNMENTS OVERVIEW

Course Assignments (see Course Schedule):

Date	Chapters to read	Homework	Due
June, 09	Introduction and class expectation Chapter 1 – Data and Data Preparation	Chapter 1 LearnSmart Chapter 1 Sample Test questions	
June, 10	Chapter 2-Tabular and Graphical Methods	Chapter 2 LearnSmart Chapter 2 Sample Test questions Relative Frequency Case Study	
June, 11	Chapter 3-Numerical Descriptive Measures	Chapter 3 LearnSmart Chapter 3 Sample Test questions	
June, 12	Chapter 4- Introduction to Probability	Chapter 4 LearnSmart Chapter 4 Sample Test questions Probability Case Study	
June, 13	Test 1 - Chapters 1-4		LearnSmart: Chapter 1-4 Sample Test Questions: Chapter 1-4

Date	Chapters to read	Homework	Due
	“You must take the exam any time before midnight on this day”		Relative Frequency Case Study Probability Case Study
June, 16	Chapter 6- Continuous Probability Distributions		
June, 17	Chapter 6- Continuous Probability Distributions Chapter 7-Sampling and Sampling Distributions	Chapter 6 LearnSmart Chapter 6 Sample Test Questions

July, 02	Chapter 14-Regression Analysis	Chapter 14 LearnSmart Chapter 14 Sample Test Questions	
July, 03	Test 4- Chapters 13-14 (Optional final) “You may take this exam any time before midnight on this day”		LearnSmart: Chapters 13-14 Sample Test Questions: Chapter 13-14 ANOVA Case Study

COURSE & UNIVERSITY POLICIES

[] **Late Work:** Except in cases of documented serious illness or documented emergency no late work will be accepted. Technical difficulties do not qualify as an emergency unless the problem is severe, prolonged, and on the server end (the problem is with Canvas). In such cases, the due date will be modified and a new due date specified. Expect technical difficulties on your own end and make arrangements for a secondary location from which to post and/or an alternative Internet Service Provider.

[] **Posting Difficulties:** Files which do not post correctly in the assignments area or responses which do not correctly post on the discussion board will not be accepted for a grade. If your file does not post (you are timed out, for example), becomes corrupted, contains a virus, or if your response is blank/partial, you should re-post prior to the deadline so that you may receive a grade. Always check to see that your response or file has correctly posted before you exit Canvas. Be sure to post in advance so that you have enough time to correct for any posting difficulties.

[] **Academic Integrity:** Cheating is strictly prohibited at the University of Oklahoma, because it devalues the degree you are working hard to get. As a member of the OU community it is your responsibility to protect your educational investment by knowing and following the rules. Absolutely no incidences of academic misconduct will be tolerated in this course. See the [Academic Integrity website](#) for more information.

[] **Special Accommodations:** Any student in this course who has a disability that may prevent the full demonstration of his or her abilities should contact me personally as soon as possible so we can discuss accommodations necessary to ensure full participation and facilitate your educational

opportunities. Students with disabilities must be registered with the Disability Resource Center prior to receiving accommodations in this course.

Students requiring academic accommodation should contact the Disability Resource Center, located in the University Community Center, 730 College Ave., for assistance at (405) 325-3852 or TDD: (405) 325-4173. For more information please see the Disability Resource Center website <http://www.ou.edu/drc/home.html>.

[] Religious Holidays: It is the policy of the University to excuse absences of students that result from religious observances and to provide without penalty for the rescheduling of examinations and additional required class work that may fall on religious holidays.

Since online courses allow students to complete course work around their unique schedules, and because you are given assignments well in advance of their due dates, most religious holidays should not conflict with the class schedule for this course. However, if you do have plans to observe a religious holiday, please notify your instructor as soon as possible in order to make appropriate arrangements for class work or rescheduling of assignments.

[] Adjustments for Pregnancy/Childbirth Related Issues: Should you need modifications or adjustments to your course requirements because of documented pregnancy-related or childbirth-related issues, please contact me as soon as possible to discuss. Generally, modifications will be made where medically necessary and similar in scope to accommodations based on temporary disability. Please see www.ou.edu/content/eoo/faqs/pregnancy-faqs.html for commonly asked questions.

[] Title IX Resources: For any concerns regarding gender-based discrimination, sexual harassment, sexual misconduct, stalking, or intimate partner violence, the University offers a variety of resources, including advocates on-call 24.7, counseling services, mutual no contact orders, scheduling adjustments and disciplinary sanctions against the perpetrator. Please contact the Sexual Misconduct Office 405-325-2215 (8-5, M-F) or OU Advocates 405-615-0013 (24.7) to learn more or to report an incident.

[] Incompletes: The OU College of Arts and Sciences advises its faculty to be very strict about the conditions under which a student is allowed to take an incomplete in a regularly scheduled, letter-graded course. A grade of Incomplete (I) will be given only for a justifiable reason (due to unavoidable circumstances, not lack of planning on the student's part) and only if the student is passing the course. It is the responsibility of the student to request a grade of "I" and to meet with the instructor as early as possible to determine requirements for completing the course. Any incomplete granted must be removed by the deadline specified by the instructor. The time limit set for removal of an incomplete will take into account the circumstances of the situation but may not exceed one calendar year.

[] Final Exam Preparation Period: Pre-finals week will be defined as the seven calendar days before the first day of finals. Faculty may cover new course material throughout this week. For specific provisions of the policy please refer to OU's Final Exam Preparation Period policy (<https://apps.hr.ou.edu/FacultyHandbook#4.10>).

COURSE COPYRIGHT

Sessions and lectures of this course may be recorded or live-streamed. These recordings are the intellectual property of the individual faculty member and may not be shared or reproduced without the explicit, written consent of the faculty member. In addition, privacy rights of others such as students, guest lecturers, and providers of copyrighted material displayed in the recording may be of concern. Students may not share any course recordings with individuals not enrolled in the class or upload them to any other online environment.

LAND ACKNOWLEDGEMENT STATEMENT

Provided by OU's Tribal Liaison office:

Long before the University of Oklahoma was established, the land on which the University now resides was the traditional home of the “Hasinai” Caddo Nation and “Kirikirʔi:s” Wichita & Affiliated Tribes.

We acknowledge this territory once also served as a hunting ground, trade exchange point, and migration route for the Apache, Comanche, Kiowa and Osage nations. Today, 39 tribal nations dwell in the state of Oklahoma as a result of settler and colonial policies that were designed to assimilate Native people. The University of Oklahoma recognizes the historical connection our university has with its indigenous community. We acknowledge, honor and respect the diverse Indigenous peoples connected to this land. We fully recognize, support and advocate for the sovereign rights of all of Oklahoma's 39 tribal nations. This acknowledgement is aligned with our university's core value of creating a diverse and inclusive community. It is an institutional responsibility to recognize and acknowledge the people, culture and history that make up our entire OU Community.

ECON 1123 Section 200: Principles of Microeconomics

University of Oklahoma
Summer, 2023

Instructor: Mahla Shourian

Office: 321 Cate Center Drive (Cate 1)

Class Meets: Mon-Fri 8:00 am - 10:15 am

Online Office Hours: Mon-Fri 10:15 am - 10:30 am

Classroom: Online

Email: mahla.shourian@ou.edu

This syllabus is a contract between you and me. By taking this course you agree to abide by the policies and rules listed within.

Text Book:

Microeconomics, 2nd edition by Acemoglu, Laibson, and List. This textbook is available at the OU Bookstore. Previous editions are available through various outlets— these are fine to use as well. All my lecture notes are based on this text book. Therefore, I combined all the lecture notes which is available in the King Kopy & Printing at 119 W Boyd St 112, Norman. If you don't want to buy the book, I will strongly encourage you to buy (or have) hard copy of the lecture notes from the King Kopy if you wish to do well in this course. In addition, I will also upload lecture notes based on the text book for each chapter in Canvas. Please regularly visit **Modules** in Canvas where I have upload all necessary study materials.

Prerequisite:

Compass placement into Math 1503 or 1643 or higher or ACT Math 23 / SAT Math 540

Course Description:

Introduction to microeconomic analysis concentrating on consumer and producer behavior, competitive and imperfect markets, and public policy and regulation.

Learning Outcomes:

The purpose of this course is to give students a thorough understanding of the principles of microeconomics that apply to the decisions of individuals—both consumers and producers—within

the larger economic system. It places primary emphasis on the nature and functions of product markets, and includes the study of factor markets and the role of government in promoting greater efficiency and equity in the economy. We will examine some methodological questions in economics, and cover such concepts as scarce resources, unlimited wants, and tradeoffs in decision-making.

Course Calendar:

ECON 1123 is organized into the four broad topic areas

I. Introduction of Economics: Ch1-Ch3

II. Foundation of Microeconomics: Ch4-Ch6

III. Perfect Competition, Externality and Government: Ch7 and Ch9-Ch10

IV. Market Structure: Ch12-Ch14

The course coverage will be split into two sections; each section will be two weeks long.

- There will be a homework assignment in Canvas for each of four areas.
- In Canvas I have also upload a Bonus Quiz for each chapter.
- I will hand over a practice exam on the second Tuesday of each two weeks section. You are expected to solve it by yourself.
- Because the course moves swiftly, you are strongly encouraged to read ahead.

Please see Table 3 for detailed class schedule.

Class Quiz Bonus Points:

There is no mandatory class attendance policy. However, there is an opportunity to earn some extra bonus points by attending the class regularly. During each lecture, I will ask some multiple choice questions based on the materials we learn in that's class. Note that 10 bonus points are assigned for this class quiz for both midterm and final. Therefore, at the end of the each 2 weeks window, I will count the percentage of correct answer you make and accordingly add your in class quiz bonus points in that specific exam. For example, in a 2 weeks window, if you get 16 questions right out of 20 questions we cover in the class quiz, you make 80% correct answer so you will get $80\% \times 10$ which is equivalent to 8 out of 10 added to your midterm grade.

Canvas HW Assignments:

We will cover 12 chapters in the entire semester and there will be 4 HWs, one for each 3 chapters. All the HW assignments are uploaded in the specific midterm **Module** in Canvas.

However, you will get access for each HW assignment only one 3 days before the due date, which are shown in **Table 3**. **You cannot submit an HW after the due date.** However, you can submit it anytime before the due date. Again, note that all homework will contain only multiple-choice questions.

Quiz:

In Canvas, I have uploaded a Quiz for each 3 chapters, which will be available 3 days before the due date. You will get two attempts for each multiple-choice question and can see the correct answer right after your last attempt. No late submission after the due date is allowed.

Note that you will get two attempts for each multiple-choice question and will be able to see the correct answer after the due date.

Note that you will get one attempt for each multiple-choice question and can see the correct answer after the due date.

Course Grades:

Your course grade will be based on 4 Quizzes, 4 HWs, 1 midterm exam, and a final exam. Quiz and exams weights are listed below. Exams will contain only multiple choice questions.

Table 1: Distribution of Final Grade

Index	Weights
Quiz: 4 (in Canvas) (Out of 4, the lowest will be dropped)	10%
Homework: 4 (in Canvas) (Out of 12, the lowest will be dropped)	10%
Midterm Exam: (Online)	40%
Final Exam: (Online)	40%

Grading Scale:

Exams and problem sets will be scored numerically. The following grading scale will be used to determine your letter grade for ECON 1123

A : 90 - 100 B : 80 - 89.99
C : 70 - 79.99 D : 60 - 69.99
F : 0 - 59.99

I believe in horizontal equity: all students who receive the same numerical grade will receive the same letter grade (i.e. a 90 will not be an B for one student and an A for another). I also believe in vertical equity: higher numerical grades will (obviously) correspond to higher letter grades. After grading is complete, identical adjustments may be made to everyone's grade if the median score is lower than expected.

Please note that tests will not be curved and grades will be determined in strict accordance with the policy above. I will not entertain needs based appeals of your course grade. Don't embarrass yourself by asking!! If you end up with a 69.99, you earned a grade of D.

Students who may need academic accommodations due to a disability should discuss their needs with the OU Disability Center at the beginning of the semester and request them to send an email about your disability so that I can accommodate any specific requirement during my lecture. To obtain authorized accommodations to take a test, you need to register at the Office of Disability Services center and have an updated accommodation letter for me. Accommodations and related support services such as exam administration are not provided retroactively and must be requested in advance. For more information about services and policy, please visit the university website.

Midterm and Final Exam Dates:

There will be one midterm exam. There will be 50 multiple choice questions in midterm exam and **each correct answer is worth of 2 points. 0.5 will be deducted for a wrong answer. The exam time will be 50 minutes for midterm exam.**

The final exam is worth 40% of your overall grade and there will be 50 questions and each question will be worth of 2 points and **0.5 will be deducted for a wrong answer. You will get 60 minutes for the final exam.** The dates of the exams are shown in Table 2. Please pay attention to those dates. If you miss an exam just because you forget the date, your score will be zero for that particular exam without any exception.

Keys to Success:

- Attend every class. If your target grade for this course is something above an F, then attending class everyday is the most efficient way to achieve your target. If your goal is to fail the course, then not attending class is the most efficient way to achieve your goal.

Table 2: Exam Dates

Exam	Dates
Midterm	Jun 23 (Week 2, Friday from 8:00 to 10:15 am)
Final Exam	July 7 (Week 4, Friday from 8:00 to 10:15 am)

- Read the lecture notes or the textbook. It is a very good textbook. All the lecture notes are based on the text book. Take notes while you read and attempt to reproduce important diagrams on your own.
- You learn economics by doing economics. Do the homework questions. Many of the concepts tested on the online homework problems will also be tested on the exams.
- This course stresses critical thinking; the key to success is understanding concepts and problems, not memorization.
- Do not fall behind. If you are pulling an “all nighter” to study for an exam, you are doing something wrong. If you keep up with the material, there will be no need to stay up all night studying for the exam.
- Come to office hours for help if you need it (and do not wait until right before exams to do so!). Use office hours. When you come to office hours, you are expected to ask questions about the lecture or assigned problems. Office hours will not serve as a make-up lecture.
- Do not throw away points. Do your homework regularly instead of waiting until the day it is due. This can be the difference between taking the class over again and passing with the required grade.

Academic Misconduct Policy:

The academic misconduct policy is as stated in the University of Oklahoma honor code. There will be multiple versions of all exams and each exam will be closely monitored. Cheating on an exam is a very serious violation of the misconduct code and will be treated as such. If you sign the class roll for someone else, or have someone sign the class roll for you, this is considered academic fraud.

Table 3: Class Schedule

Week1		
Mon	Jun 12	Syllabus
Tue	Jun 13	Principles of Econ (Ch1)
Wed	Jun 14	Economic Methods (Ch2)
Thu	Jun 15	Optimization (Ch3)
Fri	Jun 16	Demand and Supply (Ch4)
Sun	Jun 18	Quiz & HW Due (Ch1, Ch2, Ch3)
Week2		
Mon	Jun 19	Juneteenth Holiday
Tue	Jun 20	Consumers and Incentives (Ch5)
Wed	Jun 21	Sellers and Incentives (Ch6)
Thu	Jun 22	Midterm Review Session (Ch1 -Ch6)
Fri	Jun 23	Midterm Review Session (Ch1 -Ch6)
Sun	Jun 25	Quiz & HW Due (Ch4, Ch5, Ch6)
Week3		
Mon	Jun 26	Midterm Exam(Ch1 -Ch6)
Tue	Jun 27	Perfect Competition (Ch7)
Wed	Jun 28	Externalities (Ch9)
Thu	Jun 29	Tax and Regulation (Ch10)
Fri	Jun 30	Monopoly (Ch12)
Sun	July 02	Quiz & HW Due (Ch7, Ch9, Ch10)
Week4		
Mon	July 03	Game Theory (Ch13)
Tue	July 04	Independence Day Holiday
Wed	July 05	Oligopoly (Ch14)
Thu	July 06	Final Review Session (Ch7, Ch9, Ch10, Ch12-Ch14)
Fri	July 07	Final Exam(Cumulative) Quiz & HW Due (Ch12- Ch14)

Course Reflection Survey

The UNIVERSITY of OKLAHOMA

Term: Summer 2024

Course: ECON 2843-300: Elements of Statistics

Instructor: Mahla Shourian

Instructional Method: Synchronous video conf/remote

Total Responses: 9 out of 13

Section 1 - Student Engagement

1. How many hours per week did you spend engaged with this class (attending class, participating on discussion boards, reading, studying, projects, etc.)?

2. Approximately how many times did you interact with *Mahla Shourian* outside of class (e.g. by email, office hours, online video meeting, etc.)?

3. Why did you enroll in this course? (choose all that apply)

4. What grade do you expect to earn in this course?

5. If you have additional comments about your participation in this course or suggestions about how to make the course more engaging, please share them here:

[View Comments](#)

Section 2 – Course Organization

6. To what extent were the expectations and grading scheme for assignments and the overall course made clear?

7. To what extent did *Mahla Shourian* appear to be organized and prepared for student interactions?

8. To what extent was the course website/Canvas helpful?

9. If you have additional comments or suggestions about how the course or the course website/Canvas was organized, please share them here:

[View Comments](#)

Section 3 – Student Learning Experience

10. To what extent were the reading assignments and/or online instructional materials beneficial to your learning?

11. To what extent did *Mahla Shourian* explain or demonstrate the larger purpose or value of the material covered in this course?

12. To what extent did *Mahla Shourian* use a variety of examples or approaches to illustrate concepts?

13. How often did the assignments, projects, discussions, rehearsals, performances, and/or exams seem connected to the course content and goals?

14. In general, the following statement best describes my experience of this course up to this point is:

15. If you have additional comments or suggestions about the assignments, reading materials, discussions, online materials, projects, rehearsals, performances, exams, or other learning components in this course, please share them here:

[View Comments](#)

Section 4 - Learning Environment

16. To what extent did you feel supported and empowered as you worked to reach the academic goals in this course?

17. How often did you receive feedback on assignments within a timeframe that made it useful for future work?

18. How helpful did you find the feedback on the work you completed in this course?

19. How often did you feel safe, heard, and included in class discussions and activities?

20. To what extent did you feel respected, both as an individual student and as a person with your social identities?

21. If you have additional comments or suggestions regarding the learning environment in this course, please share them here:

[View Comments](#)

Section 5 – Course Impact on Learning

22. Which of the following skills do you think this course helped you develop or improve: (choose all that apply)

23. Which elements of this course had the most positive impact on your engagement and/or learning?

[View Comments](#)

24. Which elements of this course could be improved to have a more positive impact on your engagement and/or learning?

[View Comments](#)

Comments

5. If you have additional comments about your participation in this course or suggestions about how to make the course more engaging, please share them here:

i enjoyed it at first but began to stress about the deadlines for some reason then i would procrastinate until i had to turn it in.

[Return to Report](#)

9. If you have additional comments or suggestions about how the course or the course website/Canvas was organized, please share them here:

No comments submitted

[Return to Report](#)

15. If you have additional comments or suggestions about the assignments, reading materials, discussions, online materials, projects, rehearsals, performances, exams, or other learning components in this course, please share them here:

No comments submitted

[Return to Report](#)

21. If you have additional comments or suggestions regarding the learning environment in this course, please share them here:

Always made sure we understood concepts and added in practice exercises to give as a better understanding. Explained every step, making it easy to follow.

[Return to Report](#)

23. Which elements of this course had the most positive impact on your engagement and/or learning?

The elements that had the most positive impact on me were critical thinking and problem-solving.

I found the virtual lectures to be helpful, especially as they related to the information in the textbook and the accompanying assignments. I also appreciated the fact that all assignments and due dates were communicated in advance, to enable me to better organize my schedule.

Professor was easily accessible and really made an effort to make sure we understood lessons.

[Return to Report](#)

24. Which elements of this course could be improved to have a more positive impact on your engagement and/or learning?

The elements that I could improve on were creative thinking and listening / reflecting.

I would have liked for some of the sample test questions to have had clearer explanations included with their answers.

23. Which elements of this course had the most positive impact on your engagement and/or learning?
I believe the Case Studies made a great impact - it allowed us to see and practice the material learned in the course in real time and in a realistic way (using Excel). I believe it was great experience.

The case studies that I had to complete

The sample test question assignments had the biggest impact on my engagement and learning as it really made me think about the questions.

Critical Thinking

critical thinking

The active connection assignmen5s

24. Which elements of this course could be improved to have a more positive impact on your engagement and/or learning?

I will always be upset that we no longer have the option of purchasing a physical textbook (there's something so capitalistic about purchasing access to an online book that will expire at the end of the semester), but the online learning practices and practice tests were helpful.

Test Sample questions

Maybe better communication between teacher and student.

Research Experience

none

Nothing
